

B.A. Honours Program Outcomes

The B.A. Honours program is a much more intense course than the regular B.A. program. It gives students an in-depth view of their chosen subject across the humanities and social sciences. Students are encouraged to read and understand texts across the history and cultures of their chosen subject. They are taught to analyse the texts and concepts to become individually adept to pursue further studies into the subject or for various competitive exams. They will be able to contextualize the events and opinions surrounding various concepts and analyse its effect on the world.
