Question No. 3: Discuss various operators available in Visual Basic.

Handwritten assignment on lined paper:

Programming In Visual Basic
Assignment

Features of Visual Basic:

Visual Basic is a high-level, event-driven programming language that is easy to learn and use. It is designed for creating graphical user interfaces (GUIs) and is part of the Microsoft .NET framework. Visual Basic is a multi-paradigm language, supporting both procedural and object-oriented programming. It is a platform-independent language, meaning that code written in Visual Basic can run on any operating system that supports the .NET framework. Visual Basic is a strongly-typed language, meaning that variables must be declared with a specific data type. It is a case-sensitive language, meaning that uppercase and lowercase letters are treated as distinct characters.
