### NOTICE

Date: 4<sup>th</sup> September 2019

Dear students

As responsible members of our college community, it is our duty to contribute to a clean and sustainable environment. By sorting waste at the source, we can facilitate recycling, reduce landfill usage, and minimize pollution. The college has established a simple and effective waste segregation system on our campus. Please adhere to the following guidelines:

- Make sure to place waste items in the correct bins based on their category so as to avoid contamination by not mixing recyclables with non-recyclables or organics.
- Minimize the use of single-use plastics and disposables by opting for reusable items such as water bottles and containers.
- The campus has a composting system, be sure to place food scraps and organic waste in the designated green bins. This waste can be converted into valuable compost for the plants.

By diligently following these waste segregation guidelines, we can collectively make a significant impact on reducing our carbon footprint and contribute to a cleaner and more environmentally friendly campus.
