INTERNATIONAL CONFERENCE 'PARTITION REVISITED' DATE: SEPTEMBER 19-20 2018

About St. Bede's College

St. Bede's College has a long and illustrious tradition as a premier institution of higher education in north India. Located on a wooded knoll on Shimla's eastern fringe, its urban environment epitomises an old world charm going back over 100 years to its founding by the Order of Jesus & Mary in 1904. It is NAAC 'A' accredited (2016) and has been granted heritage status by the UGC. It is also recognised as a College with Potential for Excellence (CPE).

Location	From	King	Firin	KMS
The Mall Shimla	1	Dogra		150
Railway Station	9	Chandigarh		116
ISBT Shimla	3	Kalka		91

How to Reach
 Shatabdi Express from Delhi to Kalka. Taxi/Bus from Kalka to Shimla.
 Overnight Volvo Bus from Himachal Bhawan, Delhi to Shimla.
 Day temperature in September will be around 20°C. Medium woolens are recommended.

Partition Revisited

The Partition of India was one of the most cataclysmic events of the 20th century, engendering a terrible challenge in a country that was used to the image of a land of harmony. It involved a series of catastrophic circumstances that cost the subcontinent lakhs of lives, communal tensions, uprooted families and dispersing millions of ordinary people, with a ripple of a pen on the map of undivided India.

The upheaval caused by the Partition of the subcontinent impacted every aspect of the lives of the populations that had to cross the newly drawn border overnight, not knowing if they would ever make it to the other side alive. It was a blood-soaked freedom that dawned upon the two nations of India over 74 years, with massacres, rapes, abductions, riots and the agony of exile, including the joy of independence from colonial rule.

Seventy-one years have gone by since the Partition yet its tremors and aftershocks continue to be felt by all South Asian men and women. The consequences of the Partition have served to define and shape a severely divided and hostile India-Pakistan relationship, and laid the rawness for feud and strife between the two nations and thus in South Asia. It has also led to deeply entrenched attitudes, political ideologies and cultural orientations, which the subcontinent, these are some who argue that the birth of Pakistan as a vision of freedom, a historic responsibility, yet others, strongly believe that social and political conditions of 20th century could have precluded an incident of this nature, hence, queries in the direction of that direction. Still others are of the view that the Partition was the outcome of timing and not a premeditated and vested interests at the cost of the common citizen. In the bargain, overlooking a tragedy of some scale, the preparations.

The purpose of this seminar is to attend to the 'total landscape' encompassing, though history and politics, sociology and economics, memory and literature the Great Partition of 1947, thereby by re-visiting our past that we will be able to come to terms with, and confront our present.

CALL FOR PAPERS ON THE FOLLOWING THEMES

1. Leaders or Misleaders: Examining the role of British Rulers and Gandhian in the Partition drama.
2. Complicity and Betrayal: The colonial hand in partitioning the subcontinent.
3. Animations and Conflict: The historical roots of communalism in undivided India.
4. Mass Movements: Women during the Partition.
5. Displacement, Relocation and Rehabilitation: The migrant's condition.
6. Fractured Identities: The impact of Partition on the minorities of India and Pakistan.
7. Minorities: Their status in pre-Partition, Partition and Post-Partition.

Report to: Dr. Madhu Parmar, Department of Political Science, St. Bede's College, Navbahar, Shimla - 171002 (H.P.)

"Overview of Stock Market"

Resource Person
Dr. V. Aditya Srinivas

Time :- 10:00 A.M. - 11:00 A.M. **Platform :- Google Meet**

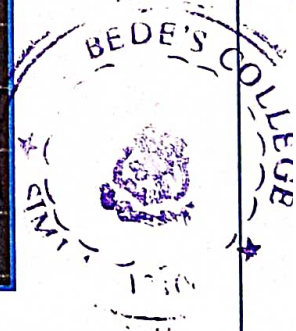

Brochure

The screenshot shows a Google Meet interface. The main window displays a presentation slide titled "BSE BENCHMARK" with a table of stock data. The table includes columns for Stock Name, Sector, and various financial metrics. The right-hand side of the screen shows a list of participants: Vnu, Ashima, and Aditya Srinivas. A "45 others" indicator is also visible. The bottom of the screen shows the Google Meet controls.

WORKSHOP ON THE MLA-STYLE SHEET

DATE: OCTOBER 14-15, 2022

Brochure

MLA (Modern Language Association) Quick Notes
(Based on the 8th Edition Handbook for Writers of Research Papers, 6th ed.)

Formatting guidelines

- The margins of your document are to be one inch (1") on all sides.
- The text of the paper should be double-spaced throughout and typed using a legible font and font size (e.g. Times New Roman, 12 pt).
- Insert the beginning of each paragraph half inch (1/2"). This can be done by pressing the Tab key once.

(Sample First Page)

Culture Themes

Dr. Ina Rago

MLA Student Center

17 Oct. 2012

The Star on 1 as Ransfordson, Widge Serwala's, A Dance of the Fama and King's Horse

This paper is a critical investigation of the African postcolonial political landscape and the social dimensions of war poems represented by Widge Serwala in 1 Dance of the Fama and King's Horse. The Poem by Nwabunah was written in 1

Annotations:

- Left your name, teacher's name, course, the date, the time in the upper left hand corner of the first page.
- Create a header in the upper right-hand corner, 1/2 inch from the top. It must include your last name and the page number.
- Control the title and use standard capitalization. Do not underline, italicize or place it within quotation marks. Use quotation marks and/or italics when referring to other works in your title.
- Double space between the 1/2 inch and the first line of the text.

NATIONAL CONFERENCE CALLED NOVEL PROGRESSIONS IN SCIENCE AND TECHNOLOGY

DATE : NOVEMBER 28-29, 2023

St. Bede's College Shimla
 Affiliated to
 Himachal Pradesh University Shimla-5
 (NAAC Re-Accredited A+ Grade)
 Heritage Status by UGC

National Conference
On
Novel Progressions in
Science & Technology-
2022
On
November 28-29, 2023

About the College
 St. Bede's College is one of the oldest and most prominent of North India which was primarily at providing quality higher education and training to women. Established in 1904, the institute was Re-Accredited with 'A+' grade for the third time by NAAC in 2016. It has also been granted College with Potential for Excellence and Heritage Status by UGC.

About the Conference
 The objective of the conference is to provide a common platform for the exchange of new ideas, applications, and research experiences, establish business or research relations, and build global partners for future collaborations.

- Sub themes of the Conference**
- Advancements in Nanoscience
 - Environment Sustainability, Biodiversity and Agricultural Science
 - Biological techniques in Life Sciences
 - Bio-engineering, Bio-therapeutics and Sustainable Food Technology
 - Development in Natural and Chemical Science
 - Advances in Mathematical and Physical Sciences
 - Artificial Intelligence and Computational Research
 - Start-ups, Innovations & Technology

Advancement in Nanoscience
 Nanoscience is an emerging zone of science which deals with the study of structures and the unique applications of materials on an ultra-nano scale. It has the potential to reshape the world around us. It could lead to revolutionary breakthroughs in fields ranging from manufacturing to health care. The term nanoscience is cross-disciplinary, meaning scientists from a range of fields including chemistry, physics, biology, medicine, engineering, materials science and statistics are analyzing it and using it to better understand our world. However, the similar term nanotechnology is the design, production and application of structures, devices and systems at the nanoscale and hence also called as molecular manufacturing. So specifically, one is dealing with the investigation of the usage of nanoscale materials and their altering properties while the other is using these materials and properties to generate something new or different.

Environment Sustainability, Biodiversity & Agricultural Science
 Biodiversity is the variety of plant and animal life in the world, including their genetic, species and ecosystems diversity. Biodiversity is the key indicator of the health of an ecosystem. It

is essential for sustainable development and human well-being. It reinforces the facility of food, fibre and water and provides resilience to climate change. Biodiversity and agriculture are mutually interrelated because both contribute towards environmental sustainability. Despite these important roles as sustainable development and ecosystem services, biodiversity is lost due to over exploitation of resources, there is a risk that some thresholds will be passed, which may cause ecosystem imbalance. Hence conservation and sustainable use of biodiversity must require for initiation and adaptation to climate change.

Biological Techniques in Life Sciences
 Biological techniques refer to any physical or chemical technique that is used to study biological processes. From the single cell to the most complex organs a wide variety of tools and techniques marking our understanding of the living world are being utilized for the same purpose. With these new advancements a plethora of information previously unknown to the scientific community is being uncovered at an astounding pace. Numerous new possibilities in the fields of medicine, agriculture and environment preservation have arisen.

Bioengineering, Bio-Therapeutics & Food Biotechnology
 Bioengineering is a discipline that applies engineering principles of design and analysis to biological systems and biomedical technologies. It is a relatively new discipline that combines many aspects of traditional engineering fields such as chemical, electrical and mechanical engineering. Bioengineering research includes human engineering in product development, new medical imaging technology, portable disease diagnostic devices, and tissue engineered organs. Biotherapeutics are "antibody-based cell therapy products where the active substance is extracted or produced from a biological source." These products include monoclonal antibodies and hormones, monoclonal antibodies (mAbs), cytokines, growth factors, gene therapy products, vaccines, cell-based products, gene-silencing editing therapies, tissue-engineered products, and stem cell therapies. Biotherapeutics has become an integral part of modern medicine and is increasingly used to treat and prevent various diseases, allergies or infectious. They have been highly effective in the treatment of a range of conditions from cancer to diabetes to rheumatoid arthritis and more. Food biotechnology is the application of modern biotechnological techniques to the manufacture and processing of food products, food ingredients and food additives. The food industry has gone through major changes in response to consumer demand for low-calorie food products enriched with natural ingredients and additives rather synthetic ones. This research area covers a wide range of

biotechnological applications as well as food production, food processing, and food preservation.

Natural & Chemical Science
 This theme covers all field chemistry that deals with the properties, composition, and structure of substances, the transformations they undergo, and the energy that is released or absorbed during these processes. Scientists are extensively involved to develop theories of matter that satisfactorily explain both permanence and change. To understand these complex behavior, this field is divided into three parts physical, organic and inorganic chemistry. To understand deep inside the field, it is further explained through several disciplines. For example, analytical chemistry, theoretical chemistry, biochemistry, medicinal chemistry, neurochemistry, material chemistry, nuclear chemistry, electrochemistry, astrochemistry, quantum chemistry, computational chemistry, flavor chemistry, natural product chemistry, organometallic chemistry, pericyclic chemistry, photochemistry, polymer chemistry, radiochemistry, supramolecular chemistry, synthetic chemistry, agrochemistry, atmospheric chemistry, chemical engineering, chemical biology, cheminformatics, environmental chemistry, geochemistry, marine chemistry, pharmacology, phytochemistry, solid-state chemistry, thermochemistry, and many others.

Advances in Mathematical & Physical Sciences
 In today's era of science and technology, the role of an interdisciplinary area developed on the crossroad of many science disciplines. There are many examples of implementing numerous models discovered by physics, chemistry and mathematics for the development of science and technology. This well-known deals with all the domains of pure and applied mathematics and physics which include Algebra, Number Theory, Graph Theory, Calculus, Matrices, Topology, Discrete Mathematics, Probability, Operational research, Fluid dynamics, Numerical analysis and computational analysis, Cryptography, Real Analysis, Materials and Photonics, Nanomaterials and Biophysics, Condensed matter theory, Soft matter, Quantum Engineering and Computational condensed matter Physics, Mechanics and Mechanical engineering, Nuclear physics, Astrophysics, Plasma Physics, Optical Physics, Statistical Mechanics, Elementary Particle Theory, Gravitation and String Theory.

Artificial Intelligence & Computational Research
 Artificial Intelligence and Computational Research use the theory, design, application, and development of biological and linguistically inspired computational processes. Artificial intelligence is more like human intelligence thinking strategically, abstractly and creatively with the ability to handle a wide range of complex tasks. Computational research is an evolving field which encompasses computing paradigms like

ambient intelligence, artificial life, cultural learning, artificial emotion, networks, social reasoning, and artificial hormone networks. Computational research plays a major role in developing successful intelligent systems, including games and cognitive developmental systems. Over the last few years there has been an explosion of research on deep learning, machine learning and neural networks. Nowadays, deep learning and machine learning has become the core method for artificial intelligence.

Innovation, Technology & Start-Up
 Nowadays, Start-ups are being widely recognised as important engines for growth and jobs generation. Through innovation and scalable technology, start-ups can generate impactful solutions, and thereby act as vehicles for socio-economic development and transformation. For innovative entrepreneurs, the process of solving the customer's problems began with observing people and keeping abreast of technological changes. The idea is not to eliminate the superfluous functions of a product or service but to tap innovative entrepreneur's in-depth knowledge of a particular subject in order to define the essence of the problem. Start-ups not just solve customer's problems but give it an innovative approach and reach to their needs through an intelligent way.

Abstract Submission
 Abstract for the poster or oral presentation should not exceed 300 words. It should be written in **TIMES NEW ROMAN** and 12 font size with 1.5 spacing. Selected abstracts will be published in the form of full papers in college Journal "The Bede Athenaeum" (Peer reviewed).

Oral Poster Presentation
 Power point presentation for the selected abstracts should not exceed 12 slides and must comprise methodology, results and outcomes. Poster should be prepared in a pre-etched format i.e. height 14 feet x breadth 3 feet.

Registration
 Last date for Abstract Submission and Registration- 25 October, 2023

Registration fee
 UG/PG Students-INR 400/-, Research Scholars-INR 800/-, Faculty, Scientists & others-INR 1000/-. Registration fee includes conference kit, lunch and tea. Participants are requested to get registered well in time. On the spot registration will be allowed with a late fee of INR 300/-.
